Description
This feature covers all compensation calculation endpoints for isolated trees, forest patches and PPAs, following the rules defined in Resolução SEMIL 02/2024 for São Paulo state.

Generated at Sat Jul 04 19:25:52 UTC 2026 by ana paola salas gomes using Jira 1001.0.0-SNAPSHOT#100292-rev:05f20e18d9bde3de68f911b4915970482f536d4e.

Core Compensation Calculator

(ETOCV-1)

[ETOCV-6] Calculate native tree compensation

Created: 30/Jun/26 Updated: 30/Jun/26

Status:	To Do		
Project:	Environmental Trade-off Calculator v2		
Components:	None		
Affects versions:	None		
Fix versions:	None		
Parent:	Core Compensation Calculator		

Type:	Subtask	Priority:	Medium
Reporter:	ana paola salas gomes	Assignee:	Unassigned

Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original estimate:	Not Specified		

Rank:	0 i00013:
Sprint:	ETOCV Sprint 1

Description

- Enter the quantity, group, municipality and endangered status of native isolated trees, so that I can get the correct compensation value per SEMIL 02/2024.
- **Acceptance Criteria:**
 - Given a valid municipality and tree group, when I submit, the compensation value is returned
 - The result matches the official SEMIL 02/2024 annex table
 - Endangered species flag doubles the compensation value
 - Empty or invalid inputs return a clear error message

Generated at Sat Jul 04 19:26:18 UTC 2026 by ana paola salas gomes using Jira 1001.0.0-SNAPSHOT#100292-rev:05f20e18d9bde3de68f911b4915970482f536d4e.

Core Compensation Calculator (ETOCV-1)

 [ETOCV-7] Calculate exotic tree compensation

Created: 30/Jun/26 Updated: 30/Jun/26

Status:	To Do		
Project:	Environmental Trade-off Calculator v2		
Components:	None		
Affects versions:	None		
Fix versions:	None

Original estimate:	Not Specified		
Rank:	0ji0001b:		
Sprint:	ETOCV Sprint 1		

Description

- Calculate compensation for exotic isolated trees, so that I can handle mixed vegetation inventories.
- **Acceptance Criteria:**
 - Exotic trees use the correct multiplier from the regulation
 - Result is distinct from native tree calculation
 - Invalid group selection returns a validation error

Generated at Sat Jul 04 19:26:41 UTC 2026 by ana paola salas gomes using Jira 1001.0.0-SNAPSHOT#100292-rev:05f20e18d9bde3de68f911b4915970482f536d4e.

Core Compensation Calculator (ETOCV-1)

Rank:	0 i0001r:
Sprint:	ETOCV Sprint 1

Description

Description

- Enter the patch area and successional stage for a given municipality, so that I can estimate the compensation cost for a forest patch impact.
- **Acceptance Criteria:**
 - Accepts area in m² and successional stage (initial, medium, advanced)
 - Returns correct compensation value per SEMIL 02/2024
 - Municipality-specific rules are applied
 - Invalid area (zero or negative) returns an error

Description

Look up a species by name and get its conservation status, so that I can correctly flag endangered species in my compensation calculations.

• Acceptance Criteria:

◦ Search accepts species name (partial match allowed)

◦ Returns conservation status (e.g. endangered, vulnerable, least concern)

◦ Species not found returns a clear "not found" message

◦ Status is sourced from SEMIL 02/2024 data

Description

- Be notified when the SEMIL regulation data in the tool is updated, so that I can trust that I am always using the current official values.
- **Acceptance Criteria:**
 - Version or last-updated date shown in the UI
 - Alert banner displayed when data was recently updated
 - Change log accessible from the UI

Generated at Sat Jul 04 19:33:47 UTC 2026 by ana paola salas gomes using Jira 1001.0.0-SNAPSHOT#100292-rev:05f20e18d9bde3de68f911b4915970482f536d4e.

Environmental trade off DoR and DoD

Definition of Ready (DoR)

- The user story is written in the format: As a [persona], I want [action], so that [benefit].
- Acceptance criteria are clearly defined and agreed upon by the team.
- The story is estimated in story points (Fibonacci scale).
- The story has no unresolved external dependencies.
- The story fits within a single sprint (if too large, it must be split).
- The priority has been assigned by the Product Owner.
- All relevant personas and journeys have been identified for this story.

Definition of Done (DoD)

- All acceptance criteria have been met and verified.
- Code has been reviewed and approved by at least one other team member.
- Unit tests written and passing for the new functionality.
- The feature has been manually tested against the regulation data (SEMIL 02/2024).
- API endpoints return correct HTTP status codes and response formats.
- Swagger/OpenAPI documentation updated if new endpoints were added.
- The feature is deployed and accessible in the target environment.
- The Product Owner has reviewed and accepted the delivered story.
